

Net Health/FOTO Research Publications

The FOTO Research Publications listed below is an excellent resource for clinicians, researchers, policy makers, and insurers.

This list provides a comprehensive overview for those who are interested in learning more about the reliability and validity of the FOTO patient reported outcome measures (PROMs) and real-life clinical application of FOTO’s database.

All publications listed in this resource are categorized by sections as detailed within the table of contents. Each section title can be used to link back to the top of the document.

Peer-reviewed publications are grouped by publication year in a descending order.
